

CSS PARTNERS WITH CMX GLOBAL

SPECIFICALLY FOR THE PLANT AND EQUIPMENT DIVISION

CSS Group and CMX Global collectively will now handle High and Heavy RoRo/Break bulk cargo specifically for the Plant and Equipment traders regardless if it is a single cargo or part of a specialist heavy equipment logistics movement. Cargo can be easily loaded on specialized vessels and stowed on high and heavy decks. Lorries, trucks, trailers, busses, excavators or over dimensional moveable machinery is the basis of the CSS – CMX Global cargo movements door to door worldwide!

“As part of CSS’s continuous diversification and market segmentation and the expansion of our global coverage in this business vertical, CSS is delighted to advise of this new partnership with a well reputed company, CMX Global whom is a well known international transportation and logistics provider in this specific business arena that specializes in heavy machinery and project cargo logistics with a global footprint reaching from USA, UK, Australia, Southeast and Fareast Asia,” added Ken Dinnadge, VP Business Development, CSS.

Together with CMX, CSS has embarked on yet another journey in order to service and add value to the heavy equipment logistics industry by offering

specialist shipping services for new and used construction equipment. Together with CMX, the leverage of the combined networks and varied expertise will be a driving force to provide end to end services in the identified market segment and to provide total unified logistic solutions for new and used heavy equipments.

“The CMX team has the knowledge and hands on experience required to provide the best possible service and tailor made solutions. With our global infrastructure and expertise in moving specialized cargo, CMX is able to offer a superior service, maintaining high standards of professionalism and delivering all cargoes on time and within budget. With our partnership with CSS Group the aim is to provide expert support for all clients heavy equipment logistic needs worldwide whilst strengthening business relationships along the way,” added Scott VanderByl, CMX Global Logistics Senior Management representative.

CSS and CMX will maintain an extensive technical database with machinery specifications of nearly all major earthmoving, construction and mining plant and equipment. This means customers will not have the hassle of

having to provide technical drawings or machinery spec's whenever they are shipping machinery internationally.

PERSONALISED SERVICE

CSS and CMX experienced teams will help you analyse your logistics options and propose a plan to match your needs. As specialists in heavy equipment machinery, it is our daily requirement to think “outside the box” to provide you with the best options from point A to point B. We can then tailor the level of support you need to implement the plan, including providing you the benefit of significant savings through our network of proven suppliers. We help manage your move, to take your business wherever it needs to go.
