CSS PARTNERS WITH CMX GLOBAL

SPECIFICALLY FOR THE PLANT AND EQUIPMENT DIVISION

CSS Group and CMX Global collectively will now handle High and Heavy RoRo/Break bulk cargo specifically for the Plant and Equipment traders regardless if it is a single cargo or part of a specialist heavy equipment logistics movement. Cargo can be easily loaded on specialized vessels and stowed on high and heavy decks. Lorries, trucks, trailers, busses, excavators or over dimensional moveable machinery is the basis of the CSS – CMX Global cargo movements door to door worldwide!

“As part of CSS’s continuous diversification and market segmentation and the expansion of our global coverage in this business vertical, CSS is delighted to advise of this new partnership with a well reputed company, CMX Global whom is a well known international transportation and logistics provider in this specific business arena that specializes in heavy machinery and project cargo logistics with a global footprint reaching from USA, UK, Australia, Southeast and Fareast Asia,” added Ken Dinnadge, VP Business Development, CSS.

Together with CMX, CSS has embarked on yet another journey in order to service and add value to the heavy equipment logistics industry by offering

specialist shipping services for new and used construction equipment. Together with CMX, the leverage of the combined networks and varied expertise will be a driving force to provide end to end services in the identified market segment and to provide total unified logistic solutions for new and used heavy equipments.

“The CMX team has the knowledge and hands on experience required to provide the best possible service and tailor made solutions. With our global infrastructure and expertise in moving specialized cargo, CMX is able to offer a superior service, maintaining high standards of professionalism and delivering all cargoes on time and within budget. With our partnership with CSS Group the aim is to provide expert support for all clients heavy equipment logistic needs worldwide whilst strengthening business relationships along the way,” added Scott VanderByl, CMX Global Logistics Senior Management representative.

CSS and CMX will maintain an extensive technical database with machinery specifications of nearly all major earthmoving, construction and mining plant and equipment. This means customers will not have the hassle of

having to provide technical drawings or machinery spec's whenever they are shipping machinery internationally.

PERSONALISED SERVICE

CSS and CMX experienced teams will help you analyse your logistics options and propose a plan to match your needs. As specialists in heavy equipment machinery, it is our daily requirement to think “outside the box” to provide you with the best options from point A to point B. We can then tailor the level of support you need to implement the plan, including providing you the benefit of significant savings through our network of proven suppliers. We help manage your move, to take your business wherever it needs to go.

JOIN HANDS WITH **Freight_{plus}**

CSS - Freight_{plus} now handles High and Heavy RoRo/Break bulk cargo – regardless if it is single cargo or part of a project movement. Cargo can be easily loaded on specialized vessels and stowed on high and heavy decks. Lorries, trucks, trailers, busses, excavators or big moveable machinery is the basis of the CSS - Freight_{plus} Global Cargo movements door to door worldwide!

As part of CSS's diversification and product development plans CSS is delighted to advise in line with our Business Development ambitions the new partnership with a well reputed company Freight_{plus} who is a well known service provider and a specialist in the world market.

Together with Freight_{plus}, CSS has embarked on yet another journey in order to service and add value to the Global Shipping and logistics market-offering specialist shipping services for new and used construction equipment. The leverage of the combined networks and varied expertise will be a driving force to provide end to end services in the identified market segment and to provide total unified logistics and freight for new and used construction equipment.

With the association and carefully selected global partners Freight_{plus} and CSS will be positioned as one of the only few project forwarders specializing in the international movement of heavy machinery.

In fact, **moving heavy machinery** across the world is what we now do, **shipping new and used mining machinery, construction equipment, earthmoving machines, exploration and drilling equipment and agricultural machinery**, every day of every week.

Whether our customers are shipping a Caterpillar dozer, a Hitachi excavator, a Komatsu dump truck or a Tadano crane, the well trained experienced crew know exactly what is required to transport heavy equipment in the safest and most economical shipping configuration.

CSS and Freight_{plus} will maintain an extensive technical database with machinery specifications of nearly all major earthmoving, construction and mining plant and equipment. This means customers will not have the hassle of having to provide technical drawings or machinery spec's whenever they are **shipping machinery internationally**.

Our operations now boasts average industry experience exceeding 15 years per person. A third of our crew each has more than 20 years experience, much of that time directly involved with **shipping heavy equipment**, using scheduled

RORO services, break bulk and container vessels and dedicated charters for larger parcels.

Whether it's CSS or one of our competitors, we strongly recommend the use heavy lift specialists when moving valuable heavy machinery and other challenging cargoes, internationally.

Customers can talk to CSS and Freight_{plus} representatives, face to face, at any time of the day or night for good advice about **shipping mining equipment, construction machinery or earthmoving machines**, transporting drill rigs, relocating a drag line, decommissioning a mine, relocating a manufacturing plant, repositioning military equipment, importing farm machinery, exporting generators or moving over dimensional cargo.

Customers can be advised that with the geographical spread of our offices, by land-line, mobile phone, email messaging, ensuring that the inquires can be responded to efficiently in a timely fashion.

As well as shipping heavy machinery around the world, Freight_{plus} provides a number of ancillary services. At origin, before shipment, our comprehensive range of services includes -

- Pre-purchase, technical machinery appraisal – covering a wide range of used heavy equipment
- Dismantling and reassembly of heavy machinery
- Steam cleaning to Australian quarantine standards for used machinery
- Steam cleaning to New Zealand quarantine standards for used machinery
- Steam cleaning to USA quarantine standards for used machinery
- Mechanical support prior to shipment
- Supervision of ship loading
- Full range of Customs services, including documentation and formalities for export
- Preparation of Carnets
- Chamber of Commerce representation
- Payment facilitation between buyer and seller (Escrow services)

When your cargo arrives at its destination port, CSS and partners can help with a number of ancillary services;

- Coordination of necessary documentation and export licenses
- Payment facilitation between buyer and seller
- Post-shipment condition appraisal – covering a wide range of used heavy equipment
- Dismantling and reassembly of heavy machinery
- Steam cleaning to Australian quarantine standards for used machinery
- Steam cleaning to New Zealand quarantine standards for used machinery
- Steam cleaning to USA quarantine standards for used machinery
- Mechanical support during all stages of shipment
- Supervision of vessel discharge
- Crane services, with doggers and riggers
- Container devanning
- Fumigation
- Full range of Customs services for import
- Full range of quarantine compliance services
- Processing of transport permits
- Customs tariff concession applications
- Duty drawbacks
- Duty audits
- Greenhouse gases compliance and reporting
- Marine Insurance claims
- Comprehensive job-site delivery
- Pre-sale refurbishment

VARIOUS TRANSPORTATION OPTIONS HOW DO WE DO IT?

AIR

- Heavylift Charters
- General Airfreight
- Urgent Parts Delivery
- Document Courier
- Hand Delivered
- Hassle free

SEA

- Vessel Charters
- Roll-on, Roll-off
- Lift-on, Lift-off (Break bulk)

- Less Than Container Loads
- Workable solutions
- Best freight rates

LAND

- Road Transport
- Rail Transport

- SGS inspections
- Marine insurance
- Marine surveys
- Comprehensive service ex job-site

There is much more to transporting massive machines from site to site than booking space on a ship.

As well as capably shipping heavy machinery between any two ports in the world, CSS and Freight_{plus} now also provides comprehensive support services.

CSS has been selected to provide global Heavy Plant Shipping and Logistic Services for Plant and Equipment purchased via Iron Planet's Online Auction website for cargoes moving into/out of the Middle East and Subcontinent region.

THE PREFERRED PARTNER

IronPlanet have recently expanded its global reach into the Middle East and Subcontinent region and have appointed the CSS Group as their preferred freight and logistics partner in order to provide door-to-door freight and logistic solutions no matter the size or location for cargoes purchased on line.

IronPlanet via CSS also provides complete documentation services, which enables seller and buyers complete security when handling transactions online.

ers. Their guaranteed inspection reports and exclusive IronClad Assurance enable buyers to bid with a high degree of confidence. IronPlanet is backed by Accel Partners, Kleiner Perkins Caufield and Byers, Caterpillar, Komatsu and Volvo.

IronPlanet auctioned more than 3,000 items in June 2011

IronPlanet® (www.ironplanet.com), a leading online marketplace for used heavy equipment, has sold thousands of construc-

Construction Equipment in Europe: The auction featured more than 140 items located across Europe including aerial work platforms, compressors, dumpers, excavators, forklifts, generators, telehandlers and other types of equipment.

June 9 - Agricultural and Construction Equipment: This auction will included more than 800 items from sellers located in the U.S. such as asphalt equipment, conveyors, compactors, crawler tractors, crushers, excavators,

rains, truck mounted and tower cranes.

June 23 - Agricultural and Construction Equipment: More than 350 items were on sale from sellers across the U.S. Featured items include aerial work platforms, backhoes, compactors, dozers, excavators, forklifts, on-road trucks, scrapers and skid-steers.

June 30 - Agricultural and Construction Equipment: This auction highlighted hundreds of items from sellers located in the

Chairman and CEO GREGORY J. OWENS - IRONPLANET

Greg is Chairman and CEO of IronPlanet, responsible for development, refinement and execution of the company's overall business strategy and tactics. Prior to joining IronPlanet, Greg served as Managing Director at Red Zone Capital, a Washington, D.C. private equity firm focused on strong revenue growth opportunities. Prior to that time, he was Chairman and Chief Executive Officer of Manugistics Group, Inc. (NASDAQ:MANU), where he doubled annual revenues to over \$300 million for the supply chain management software company. Before that, he served as Global Managing Partner Supply Chain Management at Accenture (NYSE:ACN) where he was a founding member of their supply chain group. Greg also serves, or has served, on several outside boards including Serena Software, Inc., S1 Corporation and SecureWorks, Inc. Greg brings to IronPlanet many years of experience and proven results in revenue growth and supply chain business management.

Greg holds a B.S. in Industrial Management from Georgia Institute of Technology and serves on the President's Advisory Board as well as the College of Management Board.

"We are delighted to be appointed the preferred freight and logistic solutions partner in the Middle East and Subcontinent region for IronPlanet as our local knowledge with global expertise will enhance this fruitful business relationship," adds T.S. Kaladharan, Chairman CSS Group. "With our reliable network of partners worldwide and our well-trained and seasoned professionals we are able to cater to a niche market in the Middle East and Subcontinent region for used construction and agricultural equipment and look forward to continually build on our business relationship with IronPlanet worldwide," says T.S. Kaladharan.

About IronPlanet

IronPlanet is the world's leading online auction companies for used construction and agricultural equipment. Their sellers achieve more profitable sales through low transaction costs and better price realizations through a global audience of buy-

ers and agricultural equipment as well as cars, trucks and powersports items in its June online auctions.

The June auctions featured equipment from many different sellers located around the world including financial institutions, OEM dealers, independent distributors, rental companies and contractors. IronPlanet's June auction calendar includes:

June 1 - IronPlanet Motors (Autos and Powersports): The auction featured more than 100 items from across the U.S. including cars, golf carts, motorcycles, RVs, trucks and more from manufacturers such as GMC, Harley-Davidson, Jeep, Mercedes Benz, Volkswagen and others.

June 2 - Agricultural and Construction Equipment: More than 550 items across the U.S. were for sale including aerial work platforms, compactors, excavators, forklifts, on-road trucks, skid-steers, trailers and more.

June 8 - Agricultural and

off-road trucks, screens, skid-steers, wheel loaders and more.

June 15 - IronPlanet Motors (Autos and Powersports): The auction featured more than 80 items located in Florida, Georgia and Utah and includes cars, golf carts, motorcycles, RVs and trucks.

June 16 - Agricultural and Construction Equipment: More than 500 items from sellers across the U.S. were up for auction. Backhoe loaders, compactors, excavators, forklifts, generators, trucks, wheel loaders and more will be part of the auction.

June 22 - Agricultural and Construction Equipment in Europe and the Middle East: The auction featured more than 250 items from across Europe and the Middle East including boom trucks, excavators, forklifts, farm tractors, off-road trucks and more.

June 23 - World Crane Auction Cranes from around the world were on sale including all terrains, crawlers, rough ter-

U.S. such as concrete equipment, excavators, loaders, skid-steers, tools, trucks, water related equipment and more.

IronPlanet offers its Priority Bid service allowing users to place bids in advance of the auction. On auction day, all items will be sold online to the highest bidder. Buyers can attend the auctions from the comfort of their office or home, saving unnecessary travel expenses to view the items or visit the auction site.

IronPlanet conducts inspection reports on the items sold in its online auctions. The reports include visual inspections of the exterior and interior conditions, operating systems, working components and fluid and oil samples. The reports are backed by IronPlanet's IronClad Assurance guaranteeing the inspection reports are accurate descriptions of the equipment's condition. The inspection reports and the IronClad Assurance equip buyers with the information they need to bid with confidence on the items they want.

CSS offers logistics for new and used machinery

[x All News](#)

April 27 - With diverse interests in logistics and freight forwarding within the UAE, the CSS Group continues to expand and add to its capabilities.

One particular area of focus for CSS over the coming year will be the provision of global shipping and logistics services for new and used construction machinery and equipment.

As a recent example of its capabilities in this sector CSS was appointed to secure a suitable vessel to load and ship a large consignment of Caterpillar dump truck machines (seen below) from Mumbai to Jebel Ali on behalf of Ritchie Bros. Auctioneers.

This was a time sensitive shipment says CSS with the cargo being required in Jebel Ali for a major auction. It had to be completely dismantled, trucked from Hyderabad to Mumbai in order to meet the chartered vessel which was capable of accommodating 777 machines, which are some of Caterpillar's largest dump trucks.

CSS managed the overland transportation across India as well as export documentation, border crossings and the actual vessel loading.
