4 x 335 Tons transformers, 4 x 50 Tons reactors and accessories of about 2500 CBM directly from the heavy lift vessel at Hamriyah Port – Sharjah onto hydraulic multi axle trailers for onward movement to the Ajman site location and installation onto the foundation by jacking and skidding

## Projects Management – At A Glance

Export of 6 fire-fighting vehicles & 4 water tankers with pumps. The shipment was transferred from the shippers yard on low beds and moved to Jebel Ali Port and loaded RORO onto the vessel to Umm Qasr. The shipment was roughly 745 CBM.

## Projects Management – At A Glance

Movement of wash water tanks from Ras Al Khaimah to Jebel Ali. The volume of the cargo transported was 1200 CBM and the vehicle that was used for its transportation was an extended long 6 axle hydraulic trailer.

## Projects Management – At A Glance

Recently the CSS open yard in Jebel Ali, UAE received a substantial cargo volume of 3000 CBM which included SGC compressors and accessories which were received at Jebel Ali Port and moved to CSS' yard for storage. In addition they also received 15 other over-sized and heavy pieces for movement which was loaded onto heavy duty low bed trailers for offloading at the CSS open yard.

## Projects Management – At A Glance

3 x 120 tonnes SGC compressors on 10 axle hydraulic trailers and accessories received at Jebel Ali Port and were offloaded onto the ground using cranes and moved to CSS' open yard.

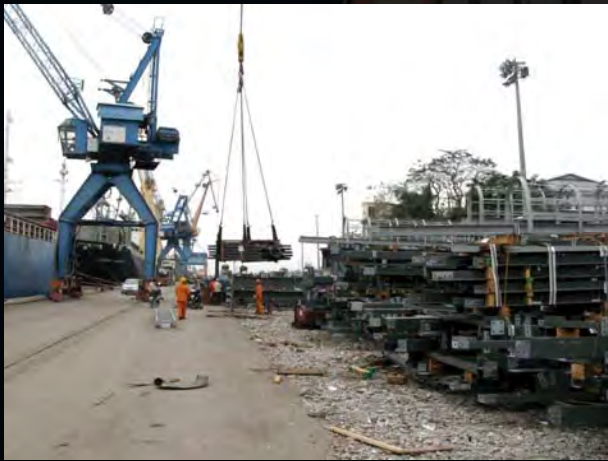

## Projects Management – At A Glance

Pressure vessels from Hamriya Port in Sharjah to Ras Laffan. 3 units weighing 53 tons each was a part of the ongoing Barzan On shore Project. As an initial phase a complete route study was undertaken and required permissions and escort put in place prior to the start up. 3 X 6 axle low bed trailers were positioned for the loading and movement of the units to the site. What made this movement more interesting was the height of the units which were 4.9 meters each. This was resolved by well-planned route study and the knowhow of the region by our team. The units were delivered on time and the Projects, Oil & Energy division had accomplished yet another successful movement.

## Projects Management – At A Glance

Projects, Oil & Energy division of CSS Group recently handled a large shipment of steel structures, from Haiphong (Vietnam) to Abu Dhabi. Volume of cargo handled was 5100 cbm  
CSS Projects, Oil & Energy division chartered a vessel to carry the cargo from Haiphong to Abu Dhabi on behalf of their client.

## Projects Management – At A Glance

CSS Group, Projects, Oil & Energy division successfully handled the transport and delivery of cable drums from Hamburg, Germany to Abu Dhabi. The volume of cargo that was handled was 245 cbm. The cargo was loaded onto 20 ft flat rack containers and lashed and secured with extra care for onward transit.

## Projects Management – At A Glance

The Projects, Oil & Energy division of CSS Group recently moved 1200 CBM of air cooler units and accessories from a supplier's yard in Malaysia to the port of Alexandria which is on the West Verge of the Nile Delta between the Mediterranean Sea and Mariut Lake in Alexandria, Egypt. The entire job was undertaken smoothly and effectively in a very short period, with close coordination with both the agents and supplier. The task ahead of the team at CSS Projects, Oil & Energy was not easy as they had received the job at a very short notice from the clients, but the team took up the challenge and proved once again their dedication and commitment to the customers' needs.

## Projects Management – At A Glance

CSS Projects, Oil & Energy recently handled and successfully delivered 12 skids, each weighing more than 33 tonnes to their final destination in Yemen. All of the 12 skids were loaded using 200 tonne cranes onto low bed trailers and were lined up in the loading area for onward road transportation. The entire operation was undertaken and supervised by the CSS Projects team to ensure the project was undertaken seamlessly with no delays encountered as it was a highly time sensitive and critical cargo. "The fact that the entire cargo was delivered to its final destination in 9 days is evidence of the hard work and commitment the team at CSS Projects puts in regardless of the type of cargo, or its final destination. I would like to extend congratulations to the entire team for a job well done," said Raj George, Senior VP, Projects, Oil & Energy, CSS

## Projects Management – At A Glance

The CSS Projects, Oil & Energy division recently completed a delivery of loose cables, which was over 16 km's in length. The task at hand was to find a solution that would enable the client to transport and install the cable, under the sea, in a smooth and effective manner. The 22KV subsea composite cable, had a volume of 450 freight tonnes, and was picked up from Tonsberg, Norway and delivered in Abu Dhabi for a government project in the Umm Al Dalkh field. "The success of this movement was in a solution oriented approach, from the inception of the idea to final execution the team involved played an extremely crucial role to ensure the needs of the client were met," added Ahmad Fuad, Sr. Business Development Manager, CSS Projects, Oil & Energy. CSS Projects, Oil & Energy also sourced the steel drum and the required equipment's that allowed for the cable to be delivered as a cable drum, to assist in final installation.
